

Prajyot Prashant Sutar

[+91 8275502257](tel:+918275502257) — prajyotsutar8681@gmail.com — [LinkedIn](#) — [GitHub](#) — [Portfolio](#)

Final-Year Computer Science Engineering student with hands-on experience building full-stack AI applications and ML systems; seeking Software Development Engineer / SDE roles.

EDUCATION

Bachelor of Technology in Computer Science Engineering

June 2027

Government College of Engineering, Kolhapur

CGPA- 7.3

Higher Secondary Education (Science)

Aug 2021 – Aug 2023

Tatyasaheb Musale Junior College, Ichalkaranji

SKILLS & SOFTWARE

Languages: Python, C, C++, JavaScript, SQL

Frameworks/Libraries: React, Node.js, Express.js, Pandas, NumPy, PyTorch

Tools & Platforms: Git, GitHub, VS Code, Power BI, Linux, Vercel, Supabase

Concepts: Machine Learning, Deep Learning, REST APIs, Data Structures & Algorithms.

PROJECTS

InterviewVerse AI: AI-Powered Interview Preparation Platform

[Live Demo](#) — [GitHub](#)

[React](#) | [TypeScript](#) | [JavaScript](#) | [Node.js](#) | [Express.js](#) | [Supabase](#) | [Gemini AI](#) | [REST API](#) | [Tailwind CSS](#) | [Vercel](#) | [Render](#)

- Developed a full-stack AI platform serving HR interviews, technical interviews, coding challenges, resume analysis, and personalized career roadmaps for job seekers.

- Integrated Gemini AI for automated interview generation, AI-driven code review, resume evaluation, and career guidance — reducing manual prep time significantly.

- Built secure authentication with Supabase and RESTful APIs using Node.js and Express.js, supporting real-time user sessions.

- Designed a responsive, accessible UI with React, TypeScript, and Tailwind CSS; deployed on Vercel (frontend) and Render (backend).

Brain Tumor MRI Analysis & Prediction System

[GitHub](#)

[Python](#) | [FastAPI](#) | [CNN](#) | [Machine Learning](#) | [Computer Vision](#) | [REST API](#) | [Grad-CAM](#) | [Scikit-learn](#)

- Developed an AI-based brain tumor MRI classification system using CNN and hybrid machine learning models to classify MRI scans into glioma, meningioma, pituitary tumor, and no tumor categories.

- Built a FastAPI REST API for MRI image upload, authentication, prediction, prediction history, tumor information, and model inference, with Swagger/OpenAPI documentation.

- Implemented Grad-CAM explainability and image morphology analysis to provide visual and quantitative insights alongside model predictions.

Aadhaar Adoption & Usage Monitor (UIDAI Hackathon)

[GitHub](#)

[Python](#) | [SQL](#) | [Power BI](#) | [Data Analysis](#) | [Data Visualization](#) | [Statistical Analysis](#) | [ETL](#) | [Dashboard Development](#)

- Analyzed large-scale Aadhaar enrollment and demographic datasets using Python, SQL, and Power BI.

- Performed trend analysis, growth metric computation, and demographic insights extraction.

- Built interactive dashboards for policy and decision-support applications.

WORK EXPERIENCE

AI Software Developer Intern @ TechSpot Infotech LLP, Sangli

Aug 2026 – Sep 2026

- Developed a Brain Tumor MRI Classification System using Python, CNN, Computer Vision, and Hybrid Machine Learning, achieving 88% CNN accuracy and improving classification performance to 93% with the hybrid model.

- Built and deployed FastAPI REST APIs for MRI image upload, authentication, real-time tumor prediction, prediction history, and model inference, reducing manual prediction workflow by ~60%.

- Integrated Scikit-learn, OpenCV, NumPy, and TensorFlow/PyTorch for preprocessing, feature extraction, model training, evaluation, and inference across 4 MRI classes.

- Designed Swagger/OpenAPI-documented REST endpoints and tested model/API workflows locally and in deployment environments, improving API testing and debugging efficiency by ~30%.

Web Development Intern @Vinayak IT Solutions, Kolhapur

Jul 2024 – Aug 2024

- Built 5+ responsive web pages and reusable UI components using HTML, CSS, and JavaScript, reducing development time for repeated layouts by 30%.

- Collaborated with a 4-member dev team to deliver 2 client projects on schedule.

- Optimized page load performance and fixed cross-browser UI bugs, improving load speed by 20%.

CERTIFICATIONS

- Software Engineering Job Simulation - [Walmart Global Tech](#)

- AI Tools Expert – [be10X](#)

- Power BI Data Visualization – [Office Masters](#)

ACHIEVEMENTS AND ACTIVITIES

- Participated in UIDAI Hackathon 2025, developing the Aadhaar Adoption & Usage Monitor analytics platform.

- Active LeetCode practitioner focused on Data Structures, Algorithms, and Problem Solving.
